

## Corporate Health Dynamics

January 16, 2017

To Whom It May Concern:

Re: Playology as a Department in Washington, D.C. for Federal Funding:

The “Department of Playology” will serve as a source for fun that leads to a force of one to empower anyone or any organization to really live a “Passionate Life of Adventure and Youthfulness”™ (PLAY) playing the biggest game plan in town, hands down. That game plan is Corporate Health Dynamics (CHD) Street Therapy.

Playology is the re-creation application of CHD Street Therapy designed for advancing the evolution of human potential in every aspect of our lives. This proposition makes this game plan a positive endeavor for getting homeless people off the streets and back on their feet to become productive and self-supporting citizens.

CHD Street Therapy is a God inspired, scientific methodology, fully operational with implications for universal application that serves as the cutting edge in organizational performance. The CHD model – a representation of the human body and its dynamics – stands as the hallmark for this scientific methodology and represents the gap that previous studies have failed to tap. Since the CHD model is functional and can be measured, it can also be authenticated as the ideal model for sophisticated scientific research in the fun-ology of Playology.

CHD Street Therapy was not only designed with the homeless person in mind, it was also designed to give everyone who has ever been limited by the infectious aspects of street influence a chance to regain their dignity in the face of morbidity, making this PLAY opportunity a bona fide occupational qualification. This opportunity gives all people a second chance to make a first impression by signing on to get their game on to become a Certified Playologist – sporting a CHD in Playology. A CHD is an advanced degree in Playology. A CHD is more advanced than a Ph.D., M.D. or a degree in Theology.

CHD Playologists are recognized as masters of inner wisdom who demonstrate proficiency in Playology – accentuating the re-creation application of CHD Street Therapy. A CHD Playologist lives in accordance with the CHD Street Therapy game plan and teach others how to live a PLAY, instead of living an antiquated Life Of Stress and Strife® (LOSS).

Playologists’ aim is not one ingrained in a LOSS; it is to foster gain by playing this game in God’s name. What God proclaims is that our life, business, health and happiness will gain added value to the tune of unlimited spiritual wealth, perfect health and the re-creation of our spiritual self. Hence, the objective of this game plan is to: Get the therapy and experience the clarity in spiritual health, healing and prosperity.

From July 2016 to December 2016, I have had the distinct pleasure of interacting with over 600 homeless people living on the streets. I found that every one that I ask if they would play along with me, as a team player, chose to accept a hand but not a handout. They all preferred to get back into a sincere career that would add meaning and purpose to their lives.

Also, I have been very instrumental in helping hundreds of homeless individuals reunite with their families and reestablish themselves back into a “playing” field of their choosing while I was working as Director of Recreation Therapy in several healthcare agencies, foster homes and educational institutions.

These above accomplishments were achieved following a 21-year career in the U.S. Navy. I served in Vietnam during 1967 and 1968 and retired with a 20 percent service connected disability in 1985. As a Vietnam era veteran, it is difficult for me to witness our veterans on the streets and homeless. It was this poignant reality that fueled my passion to play a vital part in getting less fortunate people off the streets and back on their feet and gainfully involved in playing CHD Street Therapy.

For 30 years I have conducted thousands of Power of Play sessions, utilizing the CHD model. During these sessions, I found that the dynamics that play out between Street and Therapy determine the extent to which our personal and professional values systems are aligned or misaligned with our true nature – spirituality housed within the CHD model. Spirituality (a common grace that we can all embrace) represents how our spirits come alive when we put the CHD model into play.

As a Certified Playologist who specializes in inspirational speaking and motivational training that’s dynamic and entertaining, I teach people and professional practitioners how to put the CHD Street Therapy game plan into play. In this way, the CHD model becomes a consciousness and an inspiration all through the Power of Play.

Please, let’s play together to put the less fortunate people out here on the streets back into the mainstream of life so that they can play an upper hand utilizing this incredible “game plan.” Let’s help them find meaning, purpose and dignity in a world that appears to be unfair or dares to care. Let’s show them that they have the power to flower and to set the example for empowering our youth and let that premise stand as the honest to God truth.

Imagine the remarkable and we dispel the impossible – a characteristic of street influence – and we automatically matriculate to higher levels of spiritual consciousness. This is why it is vital that we all... “Take a stand and support this plan!”
