

Corporate Health Dynamics Street Therapy

Real Change

Real change in health care and leadership dynamics will not come from one or a few individuals at the top of an organization. Real change will come from a united people guided by a shared vision (common cause) based on spiritual values, honorable intentions, and moral principles.

Imagine being a part of a cause or purpose that can change health care into self care, leadership into partnership, and employment into enjoyment where each and every one of us is equal in citizenship and responsible for our own individuality and spirituality, but united as one.

Dear friends and family, Corporate Health Dynamics (CHD) was designed for the purpose of real change. I have used CHD successfully for more than 30 years to help people help themselves with regards to spiritual health, healing, and happiness – bliss without the risk.

What the world needs now is more than love sweet love. The world needs cooperation and collaboration in order to unite our hearts in love more effectively. CHD is the key to our invincibility. Please think about it. It is time, and I encourage you all to put egos aside and take the time to explore the incredible utility and versatility of the CHD Model.

CHD is a God inspired, scientific methodology that is fully operational with implications for universal application. CHD is a now application for future aspiration and a perfect example of human spirituality and personal mastery in every aspect of our lives.

CHD is an approach that has stood the test of time, and an approach that I find to be the ultimate expression of human performance. God has given me CHD as a gift, and He has instructed me to pass His word on to all others until we become a force that can change the course of health care to self care.

Please consider the implications and universal application of this proposal. Here is an opportunity for us all to make a significant positive social change unlike anything that has ever been experienced. It is time for caring and sharing, and I am willing to share CHD with anyone and everyone who dares to care about our human and spiritual welfare.

Join me and I will teach you, so you can teach others, the dynamics for building a healthy corporation, organization, and ultimately a world population to be the elite while out here on the streets. We can operationalize CHD in the same manner we operationalize tying our shoe, brushing our teeth, or driving a car. These movements all require operational steps done individually. However, CHD is a consciousness that unfolds into an infinite number of opportunities and possibilities and requires that steps be taken together for achieving a shared vision with precision.

I await your response. Now is the time for us all to act on an opportunity that I am confident will benefit and fill the hole in our souls and significantly improve our lives, our hearts and our world as a whole. It is time for Real change. Get the CHD “T” and play along with me!
