The Existence of GOD

It is inconceivable to think that anyone who has ever lived on this planet for the minuscule period of time humans live can possibly interpret, delineate or elaborate on the existence of GOD.

GOD is omnipotent, universal and the essence of all things. Our minds are insignificant compared to GOD's magnificence - a wonder Who has existed throughout the realm of time and space.

Anyone who thinks that they can use rational thought to argue GOD's existence is out of touch with our true nature – spirituality.

We don't need to exhaust our mind trying to know GOD. All we need to know is that we are spirit, not flesh. Being in spirit will allow us to see and be with the Almighty Elite because we are all chips off the Old Block - God.

Trying to use the mind to define GOD is futile. However, transcending the limitations of mind design and aligning your mind with your spiritual design is where you will always find the Holy Divine. We exist because GOD exists.

If we chose not to believe in GOD, we chose not to believe in ourselves. We relinquish our spirits and any connection or evidence related to our existence and our true origins with God Almighty, for God always believe in us. As a result, We are pure potentiality seeking manifestation – an image to be held in the highest esteem.

Therefore, we are not physical beings with individual minuscule mind designs. We are the subtotal of all our spiritual energy and our existence serves as a true testimony to the existence of GOD.
