

Corporate Health Dynamics (CHD) Street Therapy

“What is Street Therapy?”

I am often asked, “What is Street Therapy?” but no one has ever asked me, “What part do these two words play in advancing the evolution of human potential in every aspect of our lives?”

Scientifically and realistically, Street and Therapy are the two major players (confounding and restorative variables) that perform in the entire equation of life. However, there is a third power of persuasion within this equation and that third power of persuasion is you, housed right there within the Corporate Health Dynamics (CHD) model (resourceful variable).

The CHD model serves as a representation of the human body and its dynamics. It is the epitome of excellence, and a perfect example of how any organizational system should conduct its business. This proposition suggests that every human being serves as the power source that spawns the biggest game plan in town, hands down – CHD Street Therapy.

Over the past 30 years I have conducted thousands of Power of Play sessions, utilizing the CHD model. During these sessions, it was found that the dynamics that play out between Street and Therapy determine the extent to which our personal and professional values systems are aligned or misaligned with our true nature – spirituality. Spirituality (a common grace we can all embrace) represents how our spirits come alive when we put the CHD model into play.

As a Certified Playologist who specializes in inspirational speaking and motivational training that’s dynamic and entertaining, I teach people and professional practitioners how to put the CHD Street Therapy game plan into play. Once in play, the CHD model becomes a consciousness and an inspiration for empowering anyone or any organization to achieve his, her or its vision with precision, all through the Power of Play.

Playfully yours,

Oliver Rhodes, M.S., C.H.D., USN Retired
